SOTI MOBICONTROL
FOR WINDOWS®

SOTI has managed Windows mobile devices since they first debuted. We pioneered remote support for rugged Windows CE devices, and today we are an industry leader at delivering Enterprise Mobility Management (EMM) for Windows devices. SOTI delivers full lifecycle device management, enhanced mobile security, application and content management to all of your Windows endpoints: smartphones, rugged devices, tablets, laptops and desktops. It is the EMM solution of choice to optimize efficiency and take charge of your Windows business mobility deployment.

LEGACY WINDOWS DEVICES

Consumerization is placing less expensive devices into the hands of more workers, but many industries still need specialized line of business (LOB) devices for their core business. No one knows rugged devices like SOTI. We have been managing them for almost two decades. SOTI simplifies IT by providing a single unifying EMM solution for rugged devices in the warehouse, and consumer-grade devices in the front office areas of the company.

WINDOWS 10

Windows 10 is the first release in Microsoft's new "One Windows" strategy; one operating system for all types of endpoints and all forms of Windows 10 devices. It offers a ton of new features for both consumer and enterprise users. Together, SOTI MobiControl and Windows 10 deliver a powerful solution to manage and secure Windows endpoints, applications and content in the enterprise.

SOTI MAKES IT EASY TO MANAGE BUSINESS CRITICAL WINDOWS 10 DEVICES

The use of Windows 10 devices for your business doesn't need to be limited to your company's network. SOTI MobiControl combines built-in Windows management capabilities with SOTI's proprietary management technology to give businesses the level of management and remote support they need for their business critical Windows 10 devices deployed in the field. Whether it is fire, ambulance or police services using in-vehicle laptops, pilots using tablets, or advertisers using digital signage, SOTI MobiControl can quickly get those devices up and running and provisioned with the latest apps regardless if they are legacy or modern Windows applications. SOTI MobiControl's kiosk mode and device restrictions ensure devices are secure and being used as expected and if device or app problems are encountered, SOTI MobiControl's remote support capabilities give IT the tools and control to quickly resolve the issues.

SOTI MOBICONTROL FEATURES AND BENEFITS FOR WINDOWS

FAST AND EASY WINDOWS 10 DEPLOYMENT

- Automatically setup and configure synch settings for MS Exchange by Windows user account.
- Configure SCEP, or deploy root and client certificates for managing network connectivity and application credentials.
- Preconfigure devices for VPN connectivity, and define which applications are mandated to use the VPN connection.
- Bulk enroll devices using Windows provisioning packages.

SOTI MobiControl gets Windows devices enrolled quickly and under management safely.

GUARANTEE SECURITY AND PRIVACY

- Secure devices with passcodes and BitLocker encryption.
- Leverage Windows Information Protection (WIP) to prevent corporate files and websites from being accessed by unapproved apps.
- Ensure only authorized device users get access to apps and settings with AD and Azure AD integration.
- Create rules based on Device Health Attestation to detect, and take action on, non-compliant devices.

SOTI lets you control your workers' mobile devices to protect valuable company data and documents.

MANAGE APPLICATIONS AND CONTENT

- Enable/disable the Windows Store, and whitelist/blacklist which apps can be installed and run on a device.
- Silently deploy enterprise and Windows Store apps to devices.
- Automatically setup and configure sync settings for MS Exchange by Windows user account information.
- Deploy legacy Windows apps and include command line options to enhance app compatibility.

SOTI MobiControl ensures that applications on all of your mobile devices are installed correctly and are up to date.

CONTROL WINDOWS 10 DEVICES

Make your mobile devices easier to manage and support.

- IT administrators can enable/disable many Windows 10 device features: Cortana (voice assistant), screen capture/recording, cut/copy/paste and voice recording.
- Manage connectivity (cellular, WiFi, Bluetooth, NFC and VPN) by device, by user or even by application.
- Lockdown dedicated purpose devices with a customized kiosk to ensure ease-of-use and security.
- Send alerts or modify device behavior based on the device entering/exiting SOTI MobiControl's polygon based geofence.
- Secure, manage and configure Microsoft Hololens quickly with SOTI MobiControl and protect corporate data on the device.

SOTI lets you configure your workers' devices in accordance with your company's security guidelines.
