

IoT MANAGEMENT MADE EASY

SOTI Connect is an Internet of Things (IoT) management solution that empowers businesses to effectively manage and gain visibility into the diverse and numerous IoT-enabled devices throughout their operations.

Its highly flexible, data-driven architecture means new devices can be quickly deployed and supported while minimizing costly downtime which leads to lost productivity and revenue.

COMPLETE LIFECYCLE MANAGEMENT

From deployment to retirement, SOTI Connect helps improve the operational efficiency of your IoT-enabled devices.

SECURE & PROTECT

Remote firmware updates keep devices safe with bug fixes, and security settings prevent unauthorized access to devices.

SUPPORT FOR PRINTERS & SENSORS

Manage industrial and mobile printers and sensors with a centralized, integrated, manufacturer-agnostic solution.

SIMPLIFY YOUR BUSINESS-CRITICAL MOBILE OPERATIONS

As part of the SOTI ONE Platform, SOTI Connect allows organizations to automate, gather data, monitor every aspect of their IoT deployments and tackle problems before they occur.

PROACTIVE

- Monitor the health status of devices and automatically notify IT Admins if there are device issues.
- Remediate issues with pre-configured actions to minimize downtime.
- Instant access to IoT endpoints allows organizations to immediately troubleshoot and resolve issues.
- Automation rules issue alerts and actions when pre-defined conditions are met on the device.
- Automatically discover new IoT devices on your network and enroll and provision them within minutes.

VERSATILE

- Manage the many IoT device types and protocols within your organization's technology infrastructure.
- Consolidate multiple device management solutions into a single platform to manage your IoT initiatives.
- Collect valuable health information such as battery level, memory usage, device temperature and more to optimize the purchase and maintenance of IoT devices.

MANAGE YOUR BUSINESS-CRITICAL IoT WITH SOTI CONNECT

RECOMMENDED MINIMUM SYSTEM REQUIREMENTS

Supported Protocols

- MQTT (*MQTT Broker Solution required*)
- REST

Supported Browsers

- Google Chrome
- Mozilla Firefox

General Requirements – Install

- Windows 10 or Windows Server 2016
 - Note: Windows 10 should have at least the Anniversary update
- .NET Framework 4.7
 - Note: User must have Administrator privileges. IT domain policies should allow a local administrator to open ports

Database Requirements

- SQL Server 2017 or SQL Server 2017 Express
 - SQL Server user must have permissions to create, modify and drop databases

DEVICE DATA & DEVICE ACTION CAPABILITIES

ADVANCED DATA COLLECTION

- Collect valuable device health information such as battery level, memory usage, device temperature and more.

DATA-DRIVEN ARCHITECTURE

- Introduce support for new IoT-enabled devices within the SOTI Connect console without waiting for a software update or writing a single line of code.
- Improve deployment time for IoT solutions.

DEVICE ACTIONS

- Configure and enable device communication such as Wi-Fi and Bluetooth.
- Configure device-specific settings and initiate actions on the device such as turning lights on/off or printing a test page.

SOTI ONE PLATFORM INTEGRATION

SIMPLIFYING YOUR BUSINESS MOBILITY

Build mobile apps using SOTI Snap to put device data in the hands of field employees.

Automatically generate SOTI XSight tickets from automation rules when issues are detected.

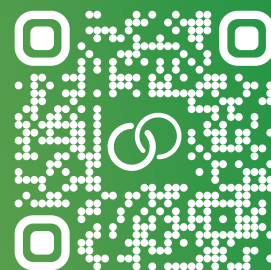

Single sign-on (SSO) support through SOTI Identity.

View manufacturer details about the device through integration from SOTI Central.
