

RUGGED DEVICE MANAGEMENT FROM SOTI

POWERFUL MANAGEMENT FOR TOUGH DEVICES IN REMOTE ENVIRONMENTS

Extreme heat and cold. Dust. Falls from high places. Rugged devices are built to handle almost anything. Since they're often used in multiple distribution centers or in remote locations where downtime is not an option, they should be centrally managed, monitored and secured - from anywhere and at any time - with the SOTI ONE Platform.

FAST DEPLOYMENT

Quickly deliver configured, ready-to-go rugged devices into the hands of your mobile workers.

SECURITY

Lockdown and whitelist essential apps only to maintain device security and worker productivity.

REMOTE TROUBLESHOOTING

Even if an issue is thousands of miles away, resolve it instantly as if the rugged device were in your hands.

There are no limits with the SOTI ONE Platform. It works just as hard as your rugged devices to keep them - and the workers who rely on them - productive and efficient.

MANAGE ANY RUGGED DEVICE TYPE

SCANNERS

TABLETS

COMPUTERS

SMARTPHONES

POWERFUL FEATURES TO HANDLE THE UNIQUE CHALLENGES OF RUGGED DEVICE MANAGEMENT

If rugged devices aren't in the field, they're not productive. The SOTI ONE Platform ensures devices get to the field faster and stay in the field longer with minimal end user intervention or costly downtime.

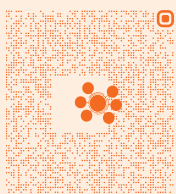

KEEP EMPLOYEES WORKING

- When battery health is essential, ensure your rugged devices can last a full shift with SOTI XSight.
- Used shared configuration to share rugged devices among field workers to streamline productivity and reduce operating costs with SOTI MobiControl.
- Ensure IoT-enabled printers are configured and up-to-date with SOTI Connect.
- Quickly push data packages and app updates to your rugged devices with SOTI MobiControl.
- Build and deploy mission-critical apps in minutes, not hours with SOTI Snap.

KEEP DEVICES PROTECTED

- Remotely diagnose, troubleshoot and resolve device issues which can bring operations to a standstill with SOTI XSight.
- Eliminate distractions by restricting rugged devices to essential apps and functions only with SOTI MobiControl.
- Send security updates, OS updates and patches to protect against unauthorized access to devices, systems and data with SOTI MobiControl.
- Locate and recover lost devices quickly and in real-time with SOTI XSight.
- Control access to the SOTI ONE Platform with SOTI Identity.
