

# SOTI SURF INTEGRATION WITH PROGLOVE

**LEADING ENTERPRISE MOBILITY MANAGEMENT WORKING HAND-IN-HAND WITH LEADING WEARABLE SCANNER TECHNOLOGY**

SOTI MobiControl includes SOTI Surf, a secure mobile browser that enables device users to access corporate data through an encrypted connection on their device. The ProGlove MARK family of wearable scanners enables workers to scan and access critical data in a faster, more efficient manner.

SOTI Surf for Android now integrates with ProGlove. The ease of quick scanning and real-time access to accurate, backend information is now available at the back of your hand.

Integrating SOTI Surf and ProGlove is easy because all you need to do is make use of custom JavaScript (JS) functions exposed by SOTI Surf into your web application. That means scanners get into the hands of workers faster, which enhances productivity and bottom line performance.

## THE SECURITY OF SOTI SURF MEETS THE SPEED OF PROGLOVE

SOTI MobiControl and SOTI Surf are all about protecting devices and data. SOTI Surf combines the elements of a traditional web browser with additional security features to ensure the safety of your data.

ProGlove scanners enable workers to scan faster and longer while making fewer errors. When there's no time to waste and mistakes must be minimized, ProGlove is the smart choice.

SOTI integration with ProGlove gives you the best of both worlds: powerful security and impeccable speed.
